EXPERIENCE

COMSORT, INC., (DBA MEDIFIND) A WHOLLY OWNED SUBSIDIARY OF MERCK CO., INC | DATA ENGINEER (FULL-TIME

SALARY)

Feb 2021 – Present | San Diego, CA

- Supported operation tasks such as data refreshes, automatic alias updates through python and airflow, etc.
- Assisted team members in troubleshooting development, test and production runs of the website.
- Wrote several python scripts to incorporate with airflow in order to automate processes.

NGOGGLE DIAGNOSTICS | CONSULTANT (DATA SCIENTIST) (PART-TIME, PAID CONTRACTOR)

Dec 2019 – Jan 2021 | San Diego, CA

- Worked on a research project that involves developing effective neurofeedback systems that can help classify sleep stages using low-cost and non-invasive EEG electrodes.
- Identified key performance indicators that are important towards improving sleep quality and for calculating the sleep onset of patients by doing exploratory analysis of the collected/available data.

UCSD COGNITIVE SCIENCE DEPARTMENT | INSTRUCTIONAL APPRENTICE (PART-TIME, NON PAID)

Sep 2019 – Dec 2019 | La Jolla, CA | COGS 108

- Assisted with the teaching of an upper division course in Data Science.
- Organized weekly discussion and office hour sections where students ask any data science related questions and get help on their projects.

SWARTZ CENTER FOR COMPUTATIONAL NEUROSCIENCE

| RESEARCH ASSISTANT VOLUNTEER (PART-TIME, NON-PAID)

Jul 2019 – Nov-2019 | San Diego, CA

- Implemented machine learning algorithms and models to assist with the detection of sleep stages on subjects diagnosed with RBD.
- Provide analytics and visualizations on how the brain signals behave under certain sleep disorders (bruxism, nocturnal frontal lobe epilepsy, etc)

PROJECTS

GENERATIVE MODELS FOR IMAGE REPRODUCTION

PYTHON | TENSORFLOW | MACHINE LEARNING | DATA SCIENCE

- Analyzed the performance of different autoencoders and adversarial neural networks for reproducing image input using the CelebA dataset.
- Built the architecture for the neural networks and the autoencoders using PyTorch and wrote multiple pipelines to pre-process the data.

MEET TO DINE - SPONSOR WINNING PROJECT

HTML | CSS | NODE.JS | ALGORITHMS

- Sponsor winning project (OpenTable) where we designed a mobile app at Cal Hacks 4.0 (UC Berkeley) that facilitates groups of people agreeing upon eating at the best location possible.
- Integrated a database, developed a location tracking functionality, and implemented backend infrastructure by developing a restaurant selection algorithm. Created application in react native using expo.io.

EDUCATION

JOHNS HOPKINS UNIVERSITY

M.S. IN DATA SCIENCE | PART-TIME (ONLINE)
Expected Dec 2022 | Baltimore, MD

UNIVERSITY OF CALIFORNIA, SAN DIEGO

B.S. IN COGNITIVE SCIENCE WITH A
SPECIALIZATION IN MACHINE LEARNING AND
NEURAL COMPUTATION
March 2020 | San Diego, CA

SKILLS

PROGRAMMING

- Python • Java • C/C++
- HTML • CSS • JavaScript
- Node.js • SQL • R

TECHNOLOGY

- MongoDB • MySQL
- Git/Github • Linux
- UNIX • Bash

STUDIES

MASTERS

Algorithms for Data Science
Data Visualization

UNDERGRADUATE

Machine Learning I and II
Adv. Machine Learning Methods
Brain Computer Interfaces
Data Science in Practice
Programming in Java I and II
Programming in C
Software Tools and Techniques
Systems Programming
Algorithms
Data Structures
Discrete Mathematics
Probability Theory
Graph Theory
Linear Algebra
Vector Calculus
